

Introducing

The online extension to your classroom

Kajour.com is in synch with the way *you* think and how your students engage. You simply log on to kajour.com, create your online classrooms, and post your assignments, media, and questions. In as little as 5 minutes, you're up and running and engaging your students with the types of digital experiences they use every day. With the click of a mouse, you can add a video, a file, or a web link, to connect real-world examples and concepts. Kajour is simple to use and no extra work for you.

Your students gain immediacy and have 24/7 access. They collaborate in your online classroom and gain an educational experience they can't get anywhere else. They share ideas. They collaborate to build new understandings and perspectives. The dialog and debate is not just with you, but with each other, or even with authorized peers from another school. Nobody sits on the sidelines. Everyone is engaged.

Kajour is safe. And secure. It's behind login. It's teacher guided. It's educationally relevant social networking™. And it's free to teachers, because it's supported by two US Department of Education grants.

kajour.com. kajour gonna love the experience - and so will your students.

kajour.com is a Knowledge Athletes®, Inc.
owned and supported website.
